## SALT LAKE AND STATE NEWS THREATENED WITH FUEL SHORTAGE

Salt Lake, Dec. 20.—With but a few hundred tons of coal on hand in the several company yards, barely sufficient to supply a forty-eight hour demand, the situation here is becoming alarming. The mines are working to their capacity, but the receipts in the local yards are far short of the demand. The present cold snap has caught many of the consumers unprepared and the fuel shortage has developed an abnormal demand upon the dealers. With the storage supply of coal cleaned out and with the total receipts of lump coal only about 200 tons daily to supply the usual consumption of from 800 to 1,000 tons for domestic purposes in Salt Lake, the dealers have been forced to accept the run of mine coal, and even under this condition are unable to secure sufficient to satisfy the demand. With the approach of the holidays it is considered likely that for a week or two at least the present receipts will be diminished.

In speaking of the matter yesterday one of the coal dealers said: "The people do not realize the gravity of the present coal situation. We simply cannot supply the demand, and there are no economic signs for the immediate future. Salt Lake uses from 800 to 1,000 tons of lump coal daily, and all the yards put together are receiving not more than 200 tons daily. We have been forced to take the run of mine coal, and when the consumers 'kick' at the quality of coal they are getting they simply do not know what the dealer is up against. On Saturday night we had only six tons of lump coal in our yard, and I know of another yard that was absolutely cleaned. Unless there is some unlooked-for relief within two weeks the people will be glad to take whatever they can get, even to 'slack,' the abandonment of the housewife."

If the shipments were cut off today I don't believe there is coal enough on hand in the city to supply the demand for forty-eight hours."

Salt Lake is almost entirely dependent upon Carbon county for its coal supply. A little is received from Wyoming, but not a sufficient amount to afford any relief. The mines at Kennamer, Diamondville and Cumberland are used to supply Idaho through the

Oregon Short Line and the Union Pacific points, especially to the eastward, take up practically the output of Rock Springs.

With the Western Pacific hauling out in the neighborhood of almost 500 tons of coal almost daily from the Utah Fuel company's mines in Carbon county, the supply furnished Salt Lake is diminished through the scarcity of available cars. Until more cars are provided, or perhaps until increased railroad facilities are furnished, Salt Lake and the surrounding market will likely be confronted with a serious problem in the winter fuel supply.

Despite the straits in which the local coal dealer finds himself, there seems no disposition to increase the present price for the consumer. In order to obtain one ton of lump coal from the mine run it is received by the dealer three tons must be handled, requiring an increase in the cost of handling the coal and necessarily resulting in some losses in the coal itself.

The men who neglected to store coal for household use in advance will have to take his chances now for a time at least, and "kicking" to the coal man will bring but little relief.

### CAMPS ARE SNOWBOUND.

Scotfield, Winter Quarters and Clear Creek Report Coldest on Record.

Scotfield, Dec. 19.—During the last week there has been a great deal of snow in Scotfield, Winter Quarters and Clear Creek.

The Denver & Rio Grande company was compelled the fore part of the week to put on over 200 Greeks and a number of Japs shoveling snow in order to keep the tracks clear.

Friday night the cold wave swept over the camps and the thermometer was 21 below zero, but Saturday the cold was felt more keenly than ever before, and the old-time settlers of 1880 said it was the coldest ever. At the station and a number of other places it was reported at 27 below zero.

It was with great difficulty that the railroad company was able to operate at all. The train going out this morning was several hours delayed on account of snow, cold and frost.

### COLD AT REXBURG.

Mercury at 25 Degrees Below Zero in Idaho.

Rexburg, Dec. 19.—The week has been the coldest of the year. Thursday and Friday night the thermometer registered 20 degrees below zero. Some places reported 25 degrees below. There is excellent sleighing here.

### IDAHO LAD KILLS SISTER WITH GUN

Rexburg, Dec. 19.—Blanche, the 4-year-old daughter of Mr. and Mrs. Albert Farnsworth of Vernon, north of Rexburg, was accidentally shot and killed Thursday night by her brother, Wael, 8 years of age. It was thought that the child had all been removed from the rifle, but one, it appears, had lodged. The boy was playing with the rifle and snapping it at his sister. After snapping several times, there was a report, and a bullet entered the little girl's forehead and lodged at the back of the brain. She lived three hours after the accident.

### BLUE CLIFF CANAL COMPANY DISBANDS

Provo, Dec. 19.—The stockholders of the Blue Cliff canal have voted to disincorporate, settle up outstanding accounts and take steps toward consolidating with the Provo Reservoir & Irrigation company. The combined forces of these two great irrigation companies is taken here to mean something out of the ordinary in reclamation schemes. Both companies have large holdings, and when consolidated a great deal of the expense of maintenance will be overcome, as either system can cover most of the county under both canals. The Provo Reservoir company will have its plant ready to pipe its water under Provo river by the time irrigation is needed in the spring.

### CASES DISPOSED OF BY BINGHAM JUSTICE

Bingham, Dec. 19.—G. A. Shaeffer was fined \$10 for disturbing the peace. Bob White was also fined \$10 for fighting and otherwise disturbing the peace, and George Smith, John Caulfield, Ed Taylor and George Williams were given fifteen days each for vagrancy before Justice P. H. Cellventra yesterday.

### COAL LOADING CONTRACT.

Scotfield, Dec. 19.—The Utah Collieries company has let a contract to P. C. Jensen and Neil M. Madsen for the shipping and loading of about 600 tons of coal a week.

Arrangements have already been made for the building of a dump and loading place at Scotfield to load the coal, which will be hauled by team to the tracks during the winter, and as soon as spring opens up the company will extend a track to the mine and cars will be delivered to the company by the railroad.

Mr. Craig of the Utah Collieries company spent two days in looking over the conditions, and reports everything in splendid condition and says that since he employed Thomas Patterson, formerly mine foreman at Clear Creek, to take charge of the mine, the work will progress rapidly.

The Union Pacific Coal company has orders for more coal this month than it can possibly fill, and the company expects to get out 35,000 tons for the month of December.

### DELIVERY FOR BINGHAM.

Brigham, Dec. 20.—Postmaster C. H. Roberts has received word that the postoffice department has decided to grant Bingham a system of free city delivery of mail. This will go into effect in a few months. The people of Bingham are highly elated at the prospect of enjoying this convenience. The district included in the proposed free delivery will extend from Yampa smelter to the southern limits of the town and up Carr Fork through the entire residence district.

The new arrangement will require more carriers, and an examination for applications will be held February 15, 1936.

### PILES CURED IN 6 TO 14 DAYS

PAZO OINTMENT is guaranteed to cure any case of itching, blind, bleeding, or protruding piles in 6 to 14 days or money refunded, 50c.
